

REMARKS

A. Background

Claims 1-18 were pending in the application at the time of the Office Action. The Office Action objected to the specification and drawings on formal grounds. Claims 1-18 were rejected as being anticipated and/or obvious over cited prior art. Applicant has amended claims 1-3 and 12, and added new claims 19 and 20. Claims 1 and 12 are the independent claims at issue. As such, claims 1-20 are presented for the Examiner's consideration in light of the following remarks.

B. Oath/Declaration

The Examiner Requested a new oath or declaration asserting the following statements are missing:

- a) I hereby state that I have reviewed and understood
- b) I acknowledge the duty to disclose

Applicants originally filed a Combined Declaration and Power of Attorney (Declaration) with the application. Applicants have reviewed the Declaration and determined that the Declaration includes the statements identified by the Examiner. A copy of the Declaration is included with this response. The relevant statements are located at the top of the second page of the Declaration.

C. Rejection on the Merits

Paragraphs 3-4 of the Office Action rejected claims 1-5 and 12-13 under 35 U.S.C. § 103(a) as being unpatentable over Shoff (U.S. Patent No. 6,240,555 B1) in view of Valdez (U.S. Patent No. 6,426,778 B1). Paragraph 5 rejected claims 6-9 and 14-16 under 35 U.S.C. § 103(a) as being unpatentable over Shoff in view of Valdez and Song (U.S. Patent No. 5,691,778). Paragraph 6 rejected claims 10-11 and 17-18 under 35 U.S.C. § 103(a) as being unpatentable over Shoff in view of Valdez and Song and further in view of Matthews (U.S. Patent No. 6,025,837).

Shoff is directed to an interactive entertainment systems that enables the presentation of supplemental interactive content along side traditional broadcast video programs such as television shows and movies. *See* col. 4, ll. 14-21. In Shoff, the programs are transmitted as continuous data stream, which are non-interactive in itself. *See Id.* Shoff teaches a viewer computing unit (Figure 2) that is configured to run an electronic program guide. *See* col. 4, ll. 35-36. The viewer computing unit receives video content programs from a head end that is interconnected to subscribers via a distribution network. *See* col. 4, ll. 43-44.

The teachings of Shoff, however are directed towards the viewer unit and methods for presenting interactive content along side traditional broadcast video programs. Shoff does not teach or suggest, as required by claim 1, “transcoder means for configuring said multimedia signals into IP format for multicast transmission.” Shoff further does not teach or suggest “a management system for managing interactive access of said subscriber to said multimedia signals,” also required by claim 1.

The use of traditional broadcast video programs is also evident in Valdez, which states that “TCP/IP information may be transmitted using the vertical blanking interval. *See* col. 9, ll. 28-30. Vertical blanking signals are present in, for example, NTSC television frames. *See* col. 9, ll. 40-42. Vertical blanking signals are not present in IP formatted multimedia signals. As a result, Valdez does not teach or suggest “transcoder means for configuring said multimedia signals into IP format for multicast transmission,” as recited in claim 1. Valdez further does not therefore teach or suggest “a management system for managing interactive access of said subscriber to said multimedia signals,” as also recited in claim 1. As a result, claim 1 is not taught or suggested by Shoff in view of Valdez. For at least these reasons, claim 12, which also requires configuring multimedia signals into IP format, is not taught or suggested by Shoff in view of Valdez.

Claims 1 and 12 are the independent claims at issue and, for at least the above reasons, are believed to overcome the cited art and are in condition for allowance. Claims 2-11, and 19-20 depend from claim 1 and thus incorporate the limitations thereof. As such, applicant submits that claims 2-11 and 19-20 are distinguished over the cited prior art for at least the same reasons as discussed above with regard to claim 1. Similarly, claims 13-18 depend from claim 12 and incorporate the limitations thereof and are distinguished over the cited art.

Claims 6-9 and 14-16 depend from claims 1 and 12 respectively and for at least this reason, overcome Shoff in view of Valdez and Song. Claims 10-11 and 17-18 also depend from claims 1 and 12 respective and for at least this reason, overcome the Shoff in view of Valdez and Son and further in view of Matthews.

D. Conclusion

Applicant notes that this response does not discuss every reason why the claims of the present application are distinguished over the cited prior art. Most notably, applicant submits that many if not all of the dependent claims are independently distinguishable over the cited prior art. Applicant has merely submitted those arguments which it considers sufficient to clearly distinguish the claims over the cited prior art.

In view of the foregoing, applicant respectfully requests the Examiner's reconsideration and allowance of claims 1-20 as amended and presented herein.

In the event there remains any impediment to allowance of the claims which could be clarified in a telephonic interview, the Examiner is respectfully requested to initiate such an interview with the undersigned.

Dated this 15th day of January 2004.

Respectfully submitted,
